Dear Madam/Sir,

Much obliged to you for providing a chance to apply for the SOFTWARE ENGINEER SUMMER INTERNSHIP at JP Morgan Chase and Co. Subsequent to perusing the description for the role, it is clear that you are looking for an applicant that is highly motivated and has the zeal for developing technologies. Given these necessities, I accept that I would be ideal for the role and be an asset to your association.

I'm a quality-oriented individual and like to deal with challenging undertakings that expect me to learn new things and work outside my usual range of familiarity. While working at scholastics and extracurricular activities, I have developed problem-solving skills, cooperation, and technical skills, which I hope to use for maximum advantage. I have a decent grasp of native android application development and a good understanding of data structures and algorithms.

I have attached my resume that lists my projects and skills. I can be reached on +91-7217818288 or on chachraanubhav@gmail.com

Sincerely,
Anubhav Chachra
